

ADRYAN MAHA PUTRA

Full-Stack Developer • Mobile Developer • AI & IoT Engineer • Game Developer & Modder
adrianmahaputra009@gmail.com linkedin.com/in/adryan-maha-putra-9a0625222
github.com/4aDudDu Pekanbaru, Riau, Indonesia

PROFESSIONAL SUMMARY

Informatics Engineering graduate (S.Kom., **Cum Laude**, GPA 3.81/4.00, 3.5 years) from Universitas Muhammadiyah Riau. Proven track record delivering production-grade systems for government agencies, automotive dealerships, and educational institutions. Skilled in full-stack web (Laravel, React.js), mobile (Flutter), AI/ML, IoT (ESP32, Fuzzy Logic), game development & modding (FiveM/QBCore, Roblox), digital forensics, and security fundamentals.

EDUCATION

Bachelor of Informatics Engineering (S.Kom.) – Universitas Muhammadiyah Riau Aug 2022 – Mar 2026
• Predicate: **Cum Laude** | Duration: 3.5 Years
• Thesis: Application of Random Forest Algorithm for Early Forest Fire Detection in Riau Based on Hotspot Image Classification on MODIS Data

WORK EXPERIENCE

Web Developer (Freelance) | Polda Riau – Divisi Humas Jul 2025 – Present
pidriau.com — Digital Information Portal
• Developed and maintained the official digital information portal for Riau Regional Police Humas Division.
• Stack: Laravel 11, Filament Admin Panel, Vite.js, Laravel Sanctum; security, scalability, structured content management.
• Ongoing monthly maintenance and feature updates under freelance contract.

Lead Developer & Modder | Bersama Kita Roleplay (FiveM/GTA V) Apr 2025 – Jan 2026
Game Server Project – FiveM/QBCore Roleplay Server
• QBCore lead developer: custom Lua resources (job systems, inventory, economy, NPC vendors), NUI (JS/HTML/CSS), ox_target/ox_lib integration.
• Designed modular Farming & Economy System with dynamic entity management and exploit-prevention logic.
• Handled full modding pipeline: EUP clothing & ped character mods, MLO interior/exterior environment creation, and server-side streamer configuration.
• Served as server defender — maintaining server stability, handling exploits, and ensuring fair roleplay environment.

Developer & Modder | Dream Story RP (FiveM/GTA V) Jan 2026 – Mar 2026
Game Server Project – FiveM/QBCore Roleplay Server
• Server/client Lua scripting, NUI development, and game feature integration on FiveM/QBCore server.
• Managed clothing mods (EUP), ped character customization, and MLO environment modding.
• Acted as server defender — monitoring and securing server from exploits and rule violations.

Developer & Modder | Exclusive RP (FiveM/GTA V) Mar 2026 – Present
Game Server Project – FiveM/QBCore Roleplay Server
• Active Lua scripting, NUI development, and ongoing feature development on FiveM/QBCore server.
• Handles clothing mods (EUP), ped character customization, MLO creation, and server defense duties.

EUP Clothing Modder | Fortune Roleplay (FiveM/GTA V) –
Game Server Project – FiveM/QBCore Roleplay Server
• Developed and integrated EUP clothing packs for the server; handled ped character clothing configuration and streamer setup.

Web Development Tutor | Guru Master Private Jun 2023 – Jul 2024
Private Tutoring
• Private tutoring in web development: HTML, CSS, JavaScript, PHP, Laravel – for students at various skill levels.

TECHNICAL SKILLS

Languages	PHP, Dart, Python, SQL, Lua, JavaScript, TypeScript, Kotlin, C++, Java
Web	Laravel (Filament, Livewire, Sanctum), CodeIgniter 4, React.js, Vite.js, Tailwind CSS, HTML5, CSS3
Mobile	Flutter (Android & iOS), React Native, Android Native (Kotlin/Java)
AI / ML	Random Forest, CNN, Scikit-learn, TensorFlow/Keras, Face-API.js, Pandas, NumPy
IoT & Embedded	ESP32, Arduino, RFID, Fuzzy Logic Control, Servo & Sensor Integration, MQTT, HTTP API from MCU
Game Dev	FiveM/QBCore (Lua, NUI – JS/HTML/CSS), Roblox Studio (Lua, 3D Multiplayer), Unity (C#)
Modding	EUP Clothing & Ped Character Mods, MLO Interior/Exterior Creation, FiveM Streamer Config
DB & Cloud	MySQL, Firebase Realtime Database, Oracle, HeidiSQL
DevOps & Tools	Git, Docker, Ubuntu Server, Postman, RESTful API, Midtrans Payment Gateway
Security/Forensics	Autopsy, FTK Imager, Wireshark, Ethical Hacking Fundamentals
OS	Linux (Ubuntu/Kali), Windows Mod (Ghost Spectre, Atlas OS), macOS, Hackintosh

PROJECTS

Web Development
CloudFace Sync – AI Realtime Attendance Dec 2025
Personal Project
• Serverless SPA: Face-API.js client-side face recognition + Firebase Realtime DB; multi-device sync without backend.

Jaecoo Pekanbaru – Official Dealership Website Aug 2025 – Sep 2025
Contract Project | jaecoopekanbaru.id
• Built official website for Chery regional automotive dealership: responsive UI, vehicle showcase, and customer lead generation (Laravel).

YPTQ Asy Syams – Learning & Registration Platform Nov 2025 – Dec 2025
Contract Project | yptqasysyams.id
• Developed full LMS: enrollment, attendance, assessments, Midtrans payment gateway. Laravel + Filament; multi-role access.

CompCare – Computer Repair & Marketplace <i>Personal Project</i> • Codelgniter 4 web app for computer repair services and used laptop/component marketplace in Pekanbaru.	Dec 2024
Mobile Development Smart Posyandu Mobile App <i>Flutter Project</i> • Digitized Posyandu health records: growth tracking, immunization, attendance, multi-role. Cross-platform Android & iOS.	Nov 2025
Student Dev & Monitoring App – SD AI-Munir <i>Flutter Project</i> • Tracks and shares student progress (Quran, prayers, academics) with parents in real time.	Nov 2025
Mobile Campus Information System <i>Personal Project</i> • Cross-platform Flutter app replicating university IS with better performance and lower RAM than browser version.	Mar 2024
AI / Machine & Deep Learning Malaria Cell Classification – CNN <i>Academic Project</i> • Binary CNN classifier: 96.22% training accuracy, 95.76% test accuracy on malaria-infected vs. healthy blood cells.	Oct 2025
IoT & Embedded Systems Smart Recycle System – Automated Waste Classification <i>KKN Community Service</i> • IoT waste sorter (organic/inorganic/metal) using ESP32, multiple sensors, automated actuators. Deployed at SDN 2 Kemuning Muda.	Aug 2025
Smart Security System – IoT-Based <i>Personal Project</i> • IoT security with PIR sensors, ESP32, camera module; real-time alert notifications for automated intruder detection and remote monitoring.	Oct 2025
Automatic Plant Irrigation – Fuzzy Logic <i>Personal Project</i> • ESP32-based automated irrigation using Fuzzy Logic control; dynamically adjusts watering based on soil moisture and environmental sensors.	Oct 2025
Moving Hand Prototype – CV & IoT <i>Personal Project</i> • Robotic hand mirroring real-time human hand movements via computer vision + embedded control systems.	Jan 2025
IoT Payment System with RFID (ESP32) <i>Academic Collaboration</i> • RFID-based IoT payment system with ESP32 + API integration; built in collaboration with campus lecturers.	Jan 2024
Game Development & Modding Roblox Virtual Campus – Universitas Muhammadiyah Riau <i>Institutional Project</i> • 3D virtual campus in Roblox Studio: real-time multiplayer, environment design, asset optimization, Lua scripting, deployment.	Oct 2025
Roblox Virtual School Map – SMAN 1 Pekanbaru <i>Institutional Project</i> • Detailed 3D virtual school map; environment modeling, asset optimization, Lua scripting, smooth multiplayer.	Oct 2025

ACADEMIC & RESEARCH ACTIVITIES

- **P2MW – SEKENID Online Marketplace**, UMRI 2023 — Funded program; developed second-hand goods marketplace for Pekanbaru users.
- **PKM – Flood Energy Generator**, UMRI 2024 — Arduino-based prototype converting floodwater currents into electrical energy.
- **PKM – Pro EyeHandle Electric**, UMRI 2025 — IoT-based eye therapy device targeting Computer & Smartphone Vision Syndrome.

LEADERSHIP & ORGANIZATIONS

Head of Kominfo Division BEM FIK – UMRI • Led digital communication, social media, and multimedia content production for faculty-level student activities.	2025 – 2026
Student Council President (OSIS I) SMKN Pertanian Terpadu Prov. Riau • Led school council, overseeing programs, extracurricular activities, and student welfare initiatives.	Oct 2020 – Apr 2021
Student Council Vice President (OSIS II) SMKN Pertanian Terpadu Prov. Riau • Supported OSIS operations, organized events, and facilitated student-staff communication.	Oct 2019 – Apr 2020

CERTIFICATIONS

- Introduction to Filament in Laravel – Dilesin (Dec 2024)
- Kickstart YourKotlin Journey–PhinconAcademy, ID: PA/FC/16/1712240019 (Dec 2024)
- IoT Foundations Fundamentals – LinkedIn Learning (May 2024)
- Software Architecture Foundations – LinkedIn Leaming (May 2024)
- Introduction to Career Skillsin SoftwareDevelopment – Linked In Learning (May 2024)
- Arduino Basic Training – Universitas Islam Riau (Jun 2023)

HONORS & AWARDS

- 1st Place – FLS2N Short Film, Pekanbaru City Level (Jun 2019)
- 3rd Place – FLS2N Short Film, Riau Province Level (Jul 2019)
- P2MW Funded Program – SEKENID Online Marketplace, UMRI (2023)
- Participant – National Traditional Game Development Competition, Universitas Nusa Cendana (Sep 2023)
