

Hello !!!

I'm Adryan Maha Putra

MOBILE DEV / IOT ENGINEER / WEB DEV / AI ENGINEER / GAME DEV

The best way to predict the future is to invent it.
- Alan Kay , Computer Science

MY BIOGRAPHY

Passionate Software Developer with experience in web, mobile, AI/ML, IoT, and game development. I enjoy transforming ideas into scalable digital solutions and continuously exploring new technologies. Experienced in developing real-world systems for government agencies, educational institutions, and private organizations.

PROBLEM SOLVER

2022 – 2026

EDUCATION

Graduated with a Bachelor's Degree in Informatics Engineering from Universitas Muhammadiyah Riau. During my studies, I focused on software development, artificial intelligence, mobile applications, and Internet of Things (IoT). Through academic projects and real-world implementations, I developed strong problem-solving, analytical thinking, and software engineering skills.

Bachelor of Informatics Engineering

Universitas Muhammadiyah Riau

Academic Highlights

- Cum Laude Graduate
- GPA 3.81 / 4.00
- Completed in 3.5 Years
- AI-Based Forest Fire Detection Research

Focus Areas

- Full Stack Development
- Artificial Intelligence & Machine Learning
- Mobile Application Development
- Internet of Things (IoT)
- Game Development

EXPERIENCE

POLDA RIAU

Web Developer - Freelancer (2025–Present)

BERSAMA KITA ROLEPLAY

Lead Developer & Modder (2025–2026)

DREAM STORY RP

Developer & Modder (2026)

EXCLUSIVE RP

Lead Developer & Modder (2026 – Present)

FORTUNE ROLEPLAY

EUP Clothing Modder (2024)

GURU MASTER PRIVATE

Web Development Tutor (2023–2024)

Developed and maintained the official digital information portal for the Public Relations Division of Riau Regional Police. Focused on content management, system maintenance, and feature enhancement using Laravel and Filament.

Lead development of custom gameplay systems, economy mechanics, and server infrastructure for a FiveM roleplay server. Designed modular Lua resources, NUI interfaces, and implemented exploit-prevention systems to improve stability and player experience.

Developed server-side and client-side gameplay features using Lua and NUI technologies. Handled EUP customization, MLO integration, and server security monitoring to ensure a stable roleplay environment.

Contributing to feature development, gameplay systems, custom interfaces, and server optimization. Responsible for Lua scripting, ped customization, MLO creation, and maintaining server security against exploits.

Developed and integrated custom EUP clothing assets, character customization systems, and streamer-ready clothing configurations for multiplayer roleplay environments.

Mentored students in HTML, CSS, JavaScript, PHP, and Laravel. Guided learners through real-world projects while strengthening problem-solving and software development fundamentals.

LEADERSHIP & ORGANIZATION

Head of Communication & Information Division

BEM FIK Universitas Muhammadiyah Riau (2025–2026)

Student Council President

SMKN Pertanian Terpadu Provinsi Riau (2020–2021)

Student Council Vice President

SMKN Pertanian Terpadu Provinsi Riau (2019–2020)

Lead digital communication strategies, content management, social media operations, and multimedia production for faculty-level student organizations.

Managed organizational programs, student activities, and leadership initiatives while coordinating communication between students and faculty.

Assisted in planning school activities, managing student affairs, and supporting organizational development.

RESEARCH & INNOVATION

P2MW — SEKENID Marketplace

Funded Student Entrepreneurship Program (2023)

PKM — Flood Energy Generator

Student Creativity Program (2024) - Invention atau Constructive Works

PKM — Pro EyeHandle Electric

Student Creativity Program (2025) - Invention atau Constructive Works

Developed an online marketplace platform for second-hand products in Pekanbaru.

Designed an Arduino-based prototype capable of converting floodwater currents into electrical energy.

Developed an IoT-based eye therapy device to help reduce Computer Vision Syndrome caused by prolonged screen exposure.

1. Melakukan pengujian awal terhadap prototipe alat untuk mengetahui karakteristik sistem kerja dan rancangan akupresur serta masker mata berbasis IoT. Titik-titik akupresur ditandai pada bagian alat untuk memberikan tekanan *refleksi* pada mata.

2. Kemudian dilakukan percobaan awal untuk memperoleh data primer mengenai keakuratan dan kinerja sistem melalui titik-titik akupresur dan temperatur suhu dan keakuratan penyesuaian temperatur suhu melalui *smartphone*.

3. Menganalisis setiap kebutuhan alat dan bahan yang diperlukan dalam proses perancangan dan perakitan alat.

3.3 Tahap Desain dan Perancangan

Proses desain dan perancangan perakitan (hardware), pemrograman (coding- software). Proses yang dilakukan dalam tahap desain dan perancangan adalah sebagai berikut: (1) Secara garis besar sistem hanya terdiri dari 2 bagian yaitu *input* (masukan), proses dan *output* (keluaran). Bagian *input* atau masukan terdiri dari pengaktifan sensor melalui *smartphone*. Bagian proses adalah sensor ESP32 Devkit V1, dan bagian output adalah titik akupresur dan suhu dingin sehingga *pro Eye-bandlectric* bisa digunakan. Lalu membuat diagram kerja alat serta skematik rangkaian elektronik pada gambar 8 berikut.

(2) Melakukan perancangan *pro eye-bandlectric*, agar memperoleh data yang akurat dalam mengatur temperatur suhu pada masker mata. (3) Melakukan desain dan perancangan casing *pro eye-bandlectric*. Setiap komponen

2. Melakukan perancangan sesuai *Prototype* untuk menghasilkan Output yang Sempurna.
3. Melakukan Desain terhadap *Prototype* seperti gambar 3 berikut.

Gambar 3. Rancangan Alat

3.3.1 Keterangan Gambar

- | | |
|--|-----------------|
| 1. Arus Banjir | 9. Kabel Jumper |
| 2. Sensor Ultrasonik dan Raindrop Sensor | 10. Dinamo |
| 3. Power Supply | 11. Micro Servo |
| 4. LCD | 12. Bendungan |
| 5. Micro Controller | 13. Turbin |
| 6. Relay | 14. Dinding |
| 7. Breadboard | 15. Resistor |
| 8. LED Indikator | |

CERTIFICATIONS & ACHIEVEMENTS

Career Skills in Software Development

Kickstart Your Kotlin Journey

Introduction to Filament in Laravel

Arduino Basic Training

Software Architecture Foundations

Introduction to Filament in Laravel

CERTIFICATIONS & ACHIEVEMENTS

Practitioner Lecture themed "Menjelajahi Berbagai Profesi Data" in the Industrial

National Competition for Traditional Game Development

FLS2N Pekanbaru City Short Film category

FLS2N Riau Province Short Film category

TECHNICAL SKILLS

01

Languages

PHP, Dart, Python, SQL, Lua, JavaScript, TypeScript, Kotlin, C++, Java

02

Web

Laravel (Filament, Livewire, Sanctum), CodeIgniter 4, React.js, Vite.js, Tailwind CSS, HTML5, CSS3

03

Mobile

Flutter (Android & iOS), React Native, Android Native (Kotlin/Java)

04

AI / ML

Random Forest, CNN, Scikit-learn, TensorFlow/Keras, Face-API.js, Pandas, NumPy

05

IoT & Embedded

ESP32, Arduino, RFID, Fuzzy Logic Control, Servo & Sensor Integration, MQTT, HTTP API from MCU

06

Game Dev

FiveM/QBCore (Lua, NUI – JS/HTML/CSS), Roblox Studio (Lua, 3D Multiplayer), Unity (C#)

07

Modding

EUP Clothing & Ped Character Mods, MLO Interior/Exterior Creation, FiveM Streamer Config

08

DB & Cloud

MySQL, Firebase Realtime Database, Oracle, HeidiSQL

09

DevOps & Tools

Git, Docker, Ubuntu Server, Postman, RESTful API, Midtrans Payment Gateway

10

Security / Forensics

Autopsy, FTK Imager, Wireshark, Ethical Hacking Fundamentals

11

OS

Linux (Ubuntu/Kali), Windows Mod (Ghost Spectre, Atlas OS), macOS, Hackintosh

POLDA RIAU

Full-Stack Web Developer

Tech Stack

Laravel 11 • Filament • Sanctum • Vite

Key Contributions

- Government information portal
- Content management system
- Security and scalability improvements
- Ongoing maintenance and development

Link

YPTQ ASY SYAMS LMS

Full-Stack Web Developer

Tech Stack

Laravel • Filament • MySQL

Features

- Student Enrollment
- Attendance Tracking
- Online Assessment
- Midtrans Payment Gateway
- Multi-Role Access

Link

JAECOO PEKANBARU

Full-Stack Web Developer

Tech Stack

Laravel • MySQL • Tailwind

Features

- Responsive design
- Vehicle showcase
- Lead generation system
- Modern company profile

Link

BEM FASILKOM UMRI WEBSITE

Full-Stack Web Developer

Tech Stack

Laravel 11 • Filament • Tailwind CSS • Vite.js • SweetAlert • MySQL • Vercel

Key Features

- Organizational Information Management
- News & Announcement Publishing
- Activity Documentation
- Responsive User Interface
- Content Management Dashboard
- Modern Web Experience

Key Contributions

- Designed and developed the full-stack web application
- Built an administrative dashboard using Filament
- Implemented responsive UI with Tailwind CSS
- Optimized performance using Vite.js
- Managed deployment and hosting configuration
- Maintained content management workflows

Link

EXCLUSIVE RP – WEB MANAGEMENT & REAL-TIME INTEGRATION SYSTEM

Full-Stack Web Developer

Tech Stack

Laravel 11 • Laravel Breeze • Tailwind CSS • MySQL • FiveM • Lua • REST API
• Discord Webhooks • Full-Stack Development • System Integration

Key Features

- Real-Time Player Data Synchronization
- FiveM Server Integration
- Discord Webhook Automation
- Centralized Admin Dashboard
- MySQL Data Management
- Automated Notification System
- Responsive Web Interface

Key Contributions

- Designed the full system architecture
- Developed backend services using Laravel 11
- Built authentication and dashboard modules with Laravel Breeze
- Created responsive interfaces using Tailwind CSS
- Integrated MySQL with FiveM server data
- Implemented Discord webhook automation
- Maintained real-time communication between game server and web platform

Link

SMAN 1 KAMPAR DIGITAL LIBRARY SYSTEM

Full-Stack Web Developer

Tech Stack

Laravel • Filament • MySQL • Telegram Bot API • Tailwind CSS

Key Features

- Book Catalog Management
- Student Member Management
- Book Borrowing & Return System
- Telegram Notification Integration
- Administrative Dashboard
- Borrowing History Tracking
- Search & Filtering System

Key Contributions

- Designed and developed the full library management system
- Built administrative dashboard using Filament
- Developed borrowing and return management modules
- Integrated Telegram Bot notifications
- Implemented database management and reporting features
- Improved efficiency of library administrative workflows

AI & IOT PROJECTS

AI & IoT Engineer

AI

- Forest Fire Detection using Random Forest
- Malaria Cell Classification using CNN
- AI Anime Recommender
- Oil palm ripeness detector using deep learning
- CloudFace Sync: AI-Powered Realtime Attendance
- Cloud Presence Face Recognition

IoT

- Smart Recycle System
- Smart Security System
- Automatic Plant Irrigation
- RFID Payment System

Tech Stack

ESP32 • Arduino • Streamlit • Random Forest • CNN

GAME DEVELOPMENT

FIVEM, Unity and Roblox Development

- Lead Developer of Bersama Kita RP
- Developer of Exclusive RP
- Developer of Dream Story RP
- Virtual Campus UMRI
- Virtual School SMAN 1 Pekanbaru
- Game Competition held by Nusa Cendana University in 2023

Expertise

- Lua Scripting
- NUI Development
- Economy Systems
- Inventory Systems
- EUP Modding
- MLO Creation
- Server Security

Roblox UMRI

FIVEM Discord

Roblox
SMANSA Pekanbaru

INSTALLING NEXTCLOUD SERVER

Server Administrator / Infrastructure Engineer

Tech Stack

Ubuntu Server • Nextcloud • Networking • Linux Administration • Local Storage

Key Contributions

- Installed and configured Ubuntu Server as the main server environment
- Deployed Nextcloud as a private cloud storage platform
- Configured local network access for internal users
- Managed user login, dashboard access, and storage structure
- Improved centralized file management for institutional needs

HACKINTOSH

System Installer / OS Configuration

Tech Stack / Tools

macOS Mojave • Windows • OpenCore • EFI
Configuration • BIOS Setup • Operating Systems

Key Contributions

- Installed macOS Mojave on Acer Nitro 515-51
- Configured OpenCore bootloader for dual-boot system
- Built and customized EFI for Kaby Lake laptop hardware
- Maintained Windows and macOS boot compatibility
- Troubleshot booting, driver, and hardware compatibility issues
- Published EFI configuration documentation on GitHub

OPERATING SYSTEMS & SYSTEM ADMINISTRATION

System Installer / OS Configuration

Tech Stack / Tools

Linux • Windows • Kali Linux • Linux Mint • OpenCore • Batocera • Atlas OS • Ghost Spectre

Key Activities

- Windows Installation & Configuration
- Kali Linux Deployment & Security Testing Environment
- Linux Mint Installation & System Customization
- Atlas OS & Ghost Spectre Performance Optimization
- Batocera Retro Gaming Environment Setup
- Hackintosh Installation using OpenCore Bootloader

Key Contributions

- Performed multi-OS installation and configuration
- Managed bootloader and dual-boot environments
- Optimized operating system performance
- Learned Linux administration and troubleshooting
- Explored cybersecurity and penetration testing environments

MOBILE CAMPUS INFORMATION SYSTEM

Mobile Developer

Tech Stack

Flutter • Dart • Firebase • REST API • Mobile UI/UX

Key Features

- Academic Information Access
- Student Profile Management
- Course Information
- Academic Monitoring
- Mobile-Friendly User Experience

Key Contributions

- Designed application architecture and navigation flow
- Developed cross-platform mobile application using Flutter
- Optimized performance compared to browser-based access
- Implemented responsive UI/UX for mobile devices
- Integrated academic information modules

SMART POSYANDU MOBILE APPLICATION

Mobile Developer

Tech Stack

Flutter • Dart • Firebase • Mobile UI/UX • Cross-Platform Development

Key Features

- Baby Growth Monitoring
- Immunization Management
- Health Record Tracking
- Attendance Management
- Multi-Role Access System
- Real-Time Data Management

Key Contributions

- Designed and developed the mobile application using Flutter
- Implemented responsive and intuitive user interfaces
- Built integrated healthcare data management modules
- Developed role-based access for cadres and administrators
- Optimized application performance for Android and iOS devices

STUDENT DEVELOPMENT & MONITORING APP

Mobile Developer

Tech Stack

Flutter • Dart • Firebase • Mobile UI/UX • Cross-Platform Development

Key Features

- Quran Recitation Progress Tracking
- Prayer Habit Monitoring
- Academic Performance Records
- Student Activity Reports
- Real-Time Parent Notifications
- Teacher Assessment Dashboard

Key Contributions

- Designed and developed the mobile application using Flutter
- Created role-based features for teachers and parents
- Implemented student monitoring and reporting modules
- Built a user-friendly dashboard for progress tracking
- Enhanced communication between schools and parents through digital reporting
